DIAMOND HILL

INVESTED IN THE LONG RUN

Team

Chris Welch, CFA
Portfolio Manager

Kristen Sheffield, CFA, CIPM
Portfolio Specialist

Tickers

Investor: DHPAX

Class I: DHPIX

Class Y: DHPYX

Philosophy and Process Highlights

Under our intrinsic value philosophy, we:

- Treat every investment as a partial ownership interest in that company
- Seek to invest at a discount to intrinsic value
- Possess a long-term investment temperament
- Recognize that market price and intrinsic value tend to converge over a reasonable period of time

Portfolio Guidelines

- Typically 40-60 positions
- Maximum position size is 7%
- Top 10 holdings are typically greater than 25% of net assets
- Maximum industry exposure is 20%
- Maximum sector exposure is 30%

Market Capitalization

The portfolio typically invests in companies with a market capitalization between \$1.5 billion and \$20 billion (or, if greater, the maximum market capitalization of companies generally within the capitalization range of the Russell Midcap Index) at the time of purchase.

Top Ten Equity Holdings¹

	Sector	% of Net Assets

Past performance is not indicative of future results. Investment returns and principal values will fluctuate so that an investor's shares, when redeemed, may be worth more or less than their original cost. The Fund's current performance may be lower or higher than the performance quoted. For current to most recent month-end performance, visit diamond-hill.com. Performance assumes reinvestment of all distributions. Returns for periods less than one year are not annualized.

Risk disclosure: Small- and mid-capitalization issues tend to be more volatile and less liquid than large-capitalization issues.

Fund holdings, sector allocations and portfolio statistics subject to change without notice.

The Russell Midcap Index measures the performance of roughly 800 US mid-cap companies. The Russell Midcap Value Index measures the performance of US mid-cap companies with lower price/book ratios and forecasted growth values. The indexes are unmanaged, market capitalization weighted, include net reinvested dividends, do not reflect fees or expenses (which would lower the return) and are not available for direct investment. Index data source: London Stock Exchange Group PLC. See diamond-hill.com/disclosures for a full copy of the disclaimer.

⁴**Active Share** measures the difference between portfolio holdings and the benchmark. The higher the active share, the greater the risk. Relative to the Russell Midcap Index. **Standard Deviation** measures the volatility of a portfolio's returns. **Beta** measures a portfolio's sensitivity to market movements. **Sharpe Ratio** is the measure of risk-adjusted return of an investment portfolio. **Alpha** is the excess return of an investment relative to the index's return. **R-squared** represents the percentage of a portfolio's movements that can be explained by general market movements. **Up/Down Capture Ratio** is used to evaluate how well a portfolio performed relative to an index during periods when that index has risen/dropped. Statistics for periods less than one year are not annualized.
